

The three co-founders of Expanite selected to speak at ICS 2018 in Venice

The three founders of Expanite have been invited by AIM, the Italian Association for Metallurgy, to speak at 7th International Congress on Science and Technology of Steelmaking (ICS 2018). The Congress will be held in Venice, at NH Venezia Congress Center - Laguna Palace on June 13 – 15 2018.

The three founders will give the following presentations at the Congress:

- 🕒 On June 14 Thomas Lundin Christiansen will give the keynote lecture “future trends in gaseous surface hardening of titanium and titanium alloys”
- 🕒 On June 15 Marcel A.J. Somers will speak on “Expanded austenite; from fundamental understanding to predicting composition- and stress-depth profiles”
- 🕒 On June 15 Thomas Strabo Hummelshøj will speak on “Stainless steel & titanium surface hardening”

Also, the first results from the WhiteWind project will be presented at this conference in a talk by Matteo Villa on June 14: “High temperature solution nitriding of martensitic stainless steels”.

ICS is a forum for researchers and manufacturers involved in the scientific and technical developments of steelmaking. This meeting is aimed at creating an opportunity for a technical exchange at an international level among the numerous experts involved in the steelmaking.
